

Appendix D: Vendors & Systems

The following list of vendors and their systems, while not complete, includes systems that are in prominent museums and archives and vendors who have been active in the museum and archives professional associations in recent years. It is notable that some specialized markets, such as churches, hospitals, universities and professional associations, have membership and development applications with specialized features that could also be useful for archives and museums, but which have not been present in the archives and museum market and are, therefore, not listed here.
